Education

University of South Carolina

August 2021 – May 2025

Bachelor of Science in Computer Science — Cybersecurity minor

GPA 3.8

- Awards: Dean's List (2021-2025), Magellan Research Award – TRIO (2024 - 2025)
- Leadership: Webmaster, ACM@USC (2024)

Experience

Doordash, Inc

October 2025 – Present

Software Engineer

- Built production web scrapers generating structured datasets powering retail partner onboarding
- Optimized legacy scraper, reducing runtime by 99%, increasing product coverage by 2.3x, and eliminating failures
- Standardized scraping workflows, tooling, and validation, enabling delivery of 30+ production scrapers in a single week
- Maintain operating hours, holiday schedules, and location data across 18+ live retailer integrations

University of South Carolina

August 2023 - May 2025

Web Scraping Engineer | *Python/Selenium, JavaScript*

- Developed resilient web scrapers mimicking human behavior to avoid detection, generating over 2 million records with a 99.9% success rate across months-long production runs
- Reduced scraper runtime by 95% using DOM manipulation and JavaScript execution
- Applied BFS to traverse product and seller networks, maximizing crawl coverage and collection efficiency

Undergraduate Teaching Assistant

Course: Algorithm Design I & II | *Java, Data structure, OOP*

- Led lab sessions for 30+ students, teaching data structures and algorithms

Courses: Introduction to Computer Concepts & General Programming | *HTML, CSS, Javascript, Python*

- Supported 200+ students during open lab hours
- Assisted honors section and grading assignment for 24+ students

Wordification by ScholarsTech LLC

May 2024 – May 2025

Software Engineer | *RedwoodJS, Typescript, GraphQL, Prisma*

- Built a demo mode enabling educators to evaluate personalized spelling lessons without student accounts, reducing onboarding friction
- Integrated the ElevenLabs API with custom validation, achieving 99.9% transcription accuracy
- Resolved 50+ issues across frontend, backend, and database layers.

Schaeffler Group

May 2024 – August 2024

Software Engineer Co-op | *Mendix, Java, External API*

- Modernized paper-based manufacturing workflows by developing a low-code application with version control, role-based access control, and reusable templates for shop-floor operators, technicians and engineers
- Integrated custom Java functions into a low-code application, increasing production throughput by 96%
- Performed fuzzy matching across 1M+ legacy records with 99.9% accuracy using the Damerau-Levenshtein algorithm
- Integrated the Jira Issues Collector API for real-time production debugging and automated Zebra label printing

PROJECT & COMPETITION

Automotive Gen AI Capstone | *C#/ASP.NET, JavaScript/React, Azure, AI*

May 2025

- Implemented an AI-powered chatbot recommending real-time vehicle data with generated navigation links

LLMs Reviewer Classification | *PyTorch, Transformers, DistilBERT, GPT2, Fine-Tuning, Text processing*

May 2025

- Achieved 92% accuracy by fine-tuning DistilBERT on 50K IMDB review dataset

CockyHacks, ACM@USC - Best Design

May 2025

Code to Give Hackathon, Morgan Stanley - 2nd place

May 2025

Technical Skills

Languages: Python, Java, C/C++, C#, JavaScript/TypeScript, HTML/CSS, PostgreSQL, SQL, MongoDB

Developer Tools: VS Code, IntelliJ, Eclipse, Google Cloud, AWS, Azure, Claude, Cursor

Certifications: AT&T Technology Academy, JPMorgan Software Engineering, VISA Token Service Technology
